B. DISCLAIMER:

1. We have consulted with our legal counsel, and have been advised that the IXO Token or its related sale is not considered a security. The Company is separate from the Token and the ixo Network. The IXO Token is not a security since it is simply a digital product that provides access to services provided through the ixo Network—users have no rights attached to the Token, outside of the rights to access and use the services of the ixo network. If the company in future determines that any service offered by the Company or by other service providers using the ixo network do fall within the scope of any regulated activity, the company reserves the right to apply to have the token and related service offerings regulated in our relevant jurisdictions.

2. The IXO token is not an investment product. This document does not constitute investment advice or counsel or solicitation for investment in any security and should not be construed in that way.

3. This document does not constitute or form part of, and should not be construed as being part of, any offer for sale, subscription, or invitation to offer to buy or subscribe to any securities, in exchange for purchase of the tokens.

4. This is not a company share stock/derivative. It is a sale of a digital asset.

5. The purchase price of the Tokens is quoted in Euros only and no determination of value in terms of cryptocurrency will be made.

6. The payment for the Tokens may be made in Euros, Swiss Francs, or in the cryptocurrencies mentioned on the company Website, in the manner specified on the Website and/or in any of the Agreements.

7. The Tokens offer no rights to profits of the Company.

8. The Tokens are not designed or disingenuously devised to acquire stock or money, or any expectation of profits.

9. The Tokens may or may not be listed by the company or by third parties on various secondary markets for trading, however such trading is incidental and non-consequential to the primary purpose and service utility of IXO Tokens on the ixo network.

11. Any usage of term "currency" is a general term associated with units of value that are recorded in the distributed ledger systems used by the ixo software protocol and ixo network; which relates to the internal market value of digital assets within the ixo network. The Company and its Affiliated Parties expressly disclaim any representation that the Company seeks to operate as an instrument of interstate commerce, "money", or monetary instrument that would be regulated by relevant governmental authorities inside or outside of the United States.

Annexure C

Certain Risks Relating to Purchase, Sale and Use of crypto-Tokens

Important Note: As noted elsewhere in these Terms, the Tokens are not being structured or sold as securities or any other form of investment contract or product. Accordingly, none of the information presented in this Annexure C is intended to form the basis for any investment decision, and no specific recommendations are intended. Company expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: (i) reliance on any information contained in this Annexure C, (ii) any error, omission or inaccuracy in any such information or (iii) any action resulting from such information.

By purchasing, holding and using Tokens, you expressly acknowledge and assume the following risks:

1. *Non-exhaustive list of Risk of Losing Access to Tokens Due to Loss of Private Key(s)*

A private key, or a combination of private keys, is necessary to control and dispose of Tokens stored in your digital wallet or vault. Accordingly, loss of requisite private key(s) associated with your digital wallet or vault storing Tokens will result in loss of such Tokens. Moreover, any third party that gains access to such private key(s), including by gaining access to login credentials of a hosted wallet service you use, may be able to misappropriate your Tokens.

2. *Non-exhaustive list of Risks Associated with Open-Source Protocols*

The open-source structure of the ixo network protocol means that the ixo network may be susceptible to developments by users or contributors, and these activities could damage the ixo network and the Company's reputation and could affect the utilization of the ixo network and the Tokens.

The ixo network operates based on an open-source protocol maintained by IXO.WORLD AG and other contributors. As an open source project, the ixo network will not be represented, maintained or monitored by an official organization or authority. The open-source nature of the ixo network and protocol means that it may be difficult for the Company or contributors to maintain or develop the ixo network and the Company may not have adequate resources to address emerging issues or malicious programs that develop within the ixo network adequately or in a timely manner. Third parties not affiliated with the Company may introduce weaknesses or bugs into the core infrastructure elements of the ixo network and open-source code which may negatively impact the ixo network. Such events may result in a loss of trust in the security and operation of the ixo network and a decline in user activity and could negatively impact the market price of the Tokens.

Because Tokens and the network are based on the ixo open-source protocol, any malfunction, breakdown or abandonment of the ixo open-source protocol may have a material adverse effect on the network or Tokens. Moreover, advances in cryptography, or technical advances such as the

development of quantum computing, could present risks to the Tokens and the network by rendering ineffective the cryptographic consensus mechanism that underpins the protocol.

3. *Non-exhaustive list of Risk of Validator Attacks*

As with other decentralized cryptographic tokens based on a blockchain protocol, the Tokens are susceptible to attacks by network validators in the course of validating Token transactions on the blockchain, including, but not limited, to double-spend attacks. Any successful attacks present a risk to the network and the Tokens, including, but not limited to, accurate execution and recording of transactions involving Tokens.

4. *Non-exhaustive list of Risk of Hacking and Security Weaknesses*

Hackers or other malicious groups or organizations may attempt to interfere with the network or the Tokens in a variety of ways, including, but not limited to, malware attacks, denial of service attacks, consensus-based attacks, sybil attacks, smurfing and spoofing. Furthermore, because the network is based on open-source software, there is a risk that a third party or a member of the Company team may intentionally or unintentionally introduce weaknesses into the core infrastructure of the network, which could negatively affect the Network and the Tokens.

5. *Non-exhaustive list of Risks Associated with Markets for Tokens*

The Tokens are intended to be used solely within the network, and Company will not support or otherwise facilitate any secondary trading or external valuation of Tokens. This restricts the contemplated avenues for using Tokens to the provision or receipt of services, and could therefore create illiquidity risk with respect to the Tokens you hold. Even if secondary trading of Tokens is facilitated by third party exchanges, such exchanges may be relatively new and subject to little or no regulatory oversight, making them more susceptible to fraud or manipulation.

Furthermore, to the extent that third parties do ascribe an external exchange value to Tokens (e.g., as denominated in a digital or fiat currency), such value may be extremely volatile and diminish to zero.

A decrease in the price of a single blockchain's assets may cause volatility in the entire blockchain asset industry and may affect other blockchain assets including the Tokens. For example, a security breach that affects user confidence in Bitcoin may affect the industry as a whole and may also cause the price of the Tokens and other blockchain assets to fluctuate.

6. *Non-exhaustive list of Risk of Uninsured Losses*

Unlike bank accounts or accounts at some other financial institutions, Tokens are uninsured unless you specifically obtain private insurance to insure them. Thus, in the event of loss or loss of utility value, there is no public insurer, or private insurance arranged by us, to offer recourse to you.

7. *Non-exhaustive list of Risks Associated with Uncertain Regulations and Enforcement Actions*

The regulatory status of the Tokens and distributed ledger technology is unclear or unsettled in many jurisdictions. It is difficult to predict how or whether regulatory agencies may apply existing regulation with respect to such technology and its applications, including the network and the Tokens. It is likewise difficult to predict how or whether legislatures or regulatory agencies may implement changes to law and regulation affecting distributed ledger technology and its applications, including the Network and the Tokens. Regulatory actions could negatively impact the network and the Tokens in various ways, including, for purposes of illustration only, through a determination that Tokens are a regulated financial instrument that require registration or licensing. Company may cease operations in a jurisdiction in the event that regulatory actions, or changes to law or regulation, make it illegal to operate in such jurisdiction, or commercially undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction.

8. *Non-exhaustive list of Risks Arising from Taxation*

The tax characterization of Tokens is uncertain. You must seek your own tax advice in connection with purchasing Tokens, which may result in adverse tax consequences to you, including withholding taxes, income taxes and tax reporting requirements.

9. *Non-exhaustive list of Risk of Alternative Networks*

It is possible that alternative networks could be established that utilize the same open source code and protocol underlying the Network and attempt to facilitate services that are materially similar to the services. The network may compete with these alternative networks, which could negatively impact the network and Tokens.

10. *Non-exhaustive list of Risk of Insufficient Interest in the Network or Distributed Applications*

It is possible that the network will not be used by a large number of individuals, companies and other entities or that there will be limited public interest in the creation and development of distributed ecosystems (such as the network) more generally. Such a lack of use or interest could negatively impact the development of the network and therefore the potential utility of Tokens.

11. *Non-exhaustive list of Risks Associated with the Development and Maintenance of the Network*

The IXO Token is a newly formed token and the network is newly formed and may undergo significant changes over time. Although we intend for the Tokens and network to follow the specifications set forth in Annexure A, and we intend to take commercially reasonable steps toward promoting the benefits of the network, the community of network validators may make changes to

the specifications of the Tokens or network for any number of reasons. For greater clarity, the goal is for the network to expand into a widely decentralized network and therefore the Company will likely not be able to exert control over the network.

This could create the risk that the Tokens or network, as further developed and maintained, may not meet your expectations at the time of purchase. Furthermore, despite our good faith efforts to promote the benefits of the network, it is still possible that the network will experience malfunctions or otherwise fail to be adequately developed or maintained, which may negatively impact the network and Tokens.

12. *Non-exhaustive list of Risk of an Unfavorable Fluctuation of Ether and Other Currency Value*

The Company team intends to use certain proceeds from selling Tokens to fund marketing expenses, educational activities, support research and development and the maintenance of the network, and other general working capital purposes, as described further in Annexure B. The proceeds of the Token sale will be denominated in Euros, and can may be converted into cryptographic and other fiat currencies. In addition, the Tokens will be denominated in fiat currencies. If the value of Ether or other currencies fluctuates unfavorably during or after the Token Sale Event, the Company team may not be able to fund said activities, or may not be able to support research and development or maintenance of the network in the manner that it intended.

13. *Non-exhaustive list of Risk of Dissolution of the Company or Network*

It is possible that, due to any number of reasons, including, but not limited to, an unfavorable fluctuation in the value of Ether (or other cryptographic and fiat currencies), decrease in the Tokens' utility, the failure of commercial relationships, lack of use of the network, or intellectual property ownership challenges, the network may no longer operate and/or the Company may dissolve.

14. *Non-exhaustive list of Risks Arising from Lack of Governance Rights*

Because Tokens confer no governance rights of any kind with respect to the Company or its corporate affiliates, all decisions involving the Company will be made by Company at its sole discretion, including, but not limited to, decisions to sell more Tokens for use in the network, or to sell or liquidate the Company. Because Tokens confer no governance rights of any kind with respect to the network, all decisions involving the network will be made by the community of network validators, including, but not limited to, decisions to discontinue the network, to create and sell more Tokens for use in the network. These decisions could adversely affect the network and the Tokens you hold.

15. *Non-exhaustive list of Risks Involving Cloud Computing and Storage*

Network validators may be operated by third-parties. Since operators of network validators (including those operated by the Company) may use third-party cloud compute and storage

providers, the network is susceptible to a number of risks related to the storage of data in the cloud, which may be compromised in the event of a cyber- attack or other malicious activity. Similarly, the network may be interrupted and become temporarily unavailable in the event of such an attack or malicious activity. Because users can use a variety of hardware and software that may interface with the network, there is the risk that the network may become unavailable or interrupted based on a failure of interoperability or an inability to integrate these third-party systems and devices with the network. The risk that the network may face interruptions and security vulnerabilities could adversely affect the network and therefore the future utility of any Tokens that you hold.

16. *Non-exhaustive list of Risks Arising from No Network Control*

The ixo network is comprised of open-source technologies that depend on a network of computers to run certain software programs to process transactions. Because of this less centralized model, the Company has limited control over the ixo network. In addition, the Buyers are not and will not be entitled, to vote or receive dividends, nor will anything be construed to confer on the Buyers any right to vote for the election of directors of the Company, or to receive notice of meetings, or to receive equity rights or otherwise.

17. *Unanticipated Risks*

Cryptographic tokens such as the Tokens are a new and untested technology. In addition to the risks included in this Annexure C, there are other risks associated with your purchase, holding and use of Tokens, including those that the Company cannot anticipate. Such risks may further materialize as unanticipated variations or combinations of the risks discussed in this Annexure C.

Annexure D

IN ORDER TO BUY IXO TOKENS AND BY BUYING IXO TOKENS, THE BUYER COVENANTS, REPRESENTS, AND WARRANTS THAT NONE OF THE OWNERS OF THE COMPANY, OF WHICH YOU ARE AN AUTHORIZED OFFICER, ARE U.S. CITIZEN OR PERMANENT RESIDENT OF THE UNITED STATES, NOR DOES HE/SHE HAVE A PRIMARY RESIDENCE OR DOMICILE IN THE UNITED STATES, INCLUDING PUERTO RICO, THE U.S. VIRGIN ISLANDS, AND ANY OTHER POSSESSIONS OF THE UNITED STATES. THE SELLER SHALL RESERVE THE RIGHT TO REFUSE SELLING IXO TOKENS TO ANYONE WHO DOES NOT MEET CRITERIA NECESSARY FOR THEIR BUYING, AS SET OUT HEREUNDER AND BY THE APPLICABLE LAW. IN PARTICULAR, THE SELLER MAY BUT IS NOT OBLIGATED TO REFUSE SELLING IXO TOKENS TO U.S. CITIZENS, PERMANENT RESIDENTS OF THE UNITED STATES AND THOSE USERS WHO DO NOT MEET ANY OTHER CRITERIA SPECIFIED HEREIN.
